To whom it may concern,

I am writing you regarding the software engineering internship role that opened up recently. I came across the job posing on Indeed and thought that I met all the necessary requirements. This summer I am seeking out a challenging but exciting and rewarding internship, which is why I was drawn to this opportunity

I currently attend Wake Technical Community College as a Computer Science Major and intend on graduating in August of 2024. While I have been enrolled in the Computer Science Program, I have focused my coursework on the following areas:

- Writing & Reviewing Code in Multiple Languages
- Designing and Developing Desktop & Web Applications
- Understanding Data Structures & Algorithms
- Gaining Experience in Debugging Code

I have been fortunate to work with professors and students on projects in HTML, Java, Python among other languages. I have gained experience using GitHub with other peers to work together. I am a highly motivated individual, committed to learning and further developing these technical skills. I am confident that I can bring enthusiasm and skills to your team to help produce high-quality product.

I am excited to learn more about this role and the company. I am available for an interview at your convenience and look forward to hearing from you.

Yours sincerely,

JP Asfoury
